DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to audio system with frequency divider (Fig. 1),
classified in class 381, subclass 98.
- II. Claims 8-15, drawn to a method of communicating and coupling externally
using an electronic medium between an audio port and audio reproduction
system (Figs. 7C-7E), classified in class 381, subclass 77.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as method and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the method as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method as claimed can be practiced by another and materially different apparatus such as connecting an audio source without a frequency divider to an external reproduction apparatus.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
